**CONTRACT  
MANUFACTURING  
OF THE WIRING  
HARNESS**

WE ADHERE TO THE HIGHEST QUALITY  
STANDARDS AND TRANSFORM ORDINARY  
WIRES INTO MASTERPIECES OF TECHNOLOGY

We make orders in batches of any volumes. You do not need to order at least 3 km of harness, if you need only 50 m

**25** **10k**

YEARS ON  
THE MARKET

UNITS OF FINISHED  
PRODUCTS PER MONTH

# WE PRODUCE HARNESS AND WIRING FOR ALL TYPES OF MACHINERY AND EQUIPMENT

We have an extensive experience in this field and we offer a wide range of harness, which meet the highest quality standards.

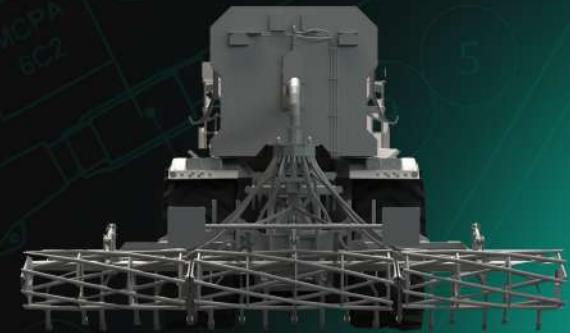

## Aviation equipment

## Water equipment

## Agricultural machinery

## Unmanned vehicles

## Special purpose vehicles

## Public transport

# THE PREPARATION OF PROJECT DOCUMENTATION

MAXIMISE YOUR OPPORTUNITIES  
WITH COMPLEX SOLUTIONS

FLYSI specialists were  
trained and work in  
accordance with the  
world quality standards

Our experience and qualification  
allow us to optimize the wiring  
harness during the engineering.  
This allows us to reduce the cost  
and improve the technical  
characteristics of the final product

## THE PRODUCTION OF THE WIRING HARNESSES FOR UNMANNED AIRCRAFT

The "Flights" LLC enterprise, which is part of the "MSS Group", executes contracts in the latest TY/Raihem technologies, mastering the aviation direction of unmanned aerial vehicles.

By the order of "AVK Skaeton" LLC, a manufacturer of an unmanned aviation system Raibird-3 the wiring harnesses were made.

Modern technologies and high quality standards are the main characteristics of the products produced by "AVK Skaeton" LLC for defense and commercial purposes. We are proud of the cooperation in modern technologies with a team of professionals.

## THE SUPPLYING OF THE WIRING HARNESSES FOR THE RECOVERY OF MI 8 HELICOPTERS

The company "Flights", which is belonged to the the MSS Group, supplied the wiring harnesses for the recovery of MI 8 helicopters participating in humanitarian and emergency rescue operations of avia company "Ukrainian Helicopters", both with the national and the international organizations.

Complex and responsible work was done in time and in accordance with the requirements of the provided engeneering documentation from the company "Air Service" LLC, which provides MI-8 service.

The company "Flights" plans in 2022 to become a key producer of the harness products for small aircraft, which is manufactured and developed in Ukraine.

## THE SUPPLYING OF THE WIRING HARNESSES FOR FIRE AND RESCUE CARS

"PK"POZHMASHYNA" LLC has been a reliable supplier of modern fire and rescue equipment for Ministry of Ukraine for Emergencies for several years. It is the extremely responsible work to provide the quality of such equipment, which should not fail in a difficult moment of fighting with fire. "PK"POZHMASHYNA" LLC can be proud of the quality compiled engineering documentation and selected modern components.

The task of "Flights" LLC was to put the wiring harnesses for fire and rescue vehicles on the conveyor in time and provide their quality.

The order has been completed and the fire departments of all parts of Ukraine receive new fire and rescue vehicles.

# ABOUT COMPANY

Since 1998 we have specialized in the development and production of the wiring harnesses for the automotive and car building industries. Our team is ready to do the complex tasks and create modern effective components for your projects
